PROJECTS

Mediquick (01/2025 – 04/2026)

Architected a responsive healthcare platform to streamline medical consultations and medicine delivery. Developed a full-stack telemedicine website using React, Node.js, Express, CRUD, RESTAPI and MongoDB, integrating appointment booking, e-prescriptions, and medicine ordering. Implemented secure authentication and role-based dashboards for 5 distinct user roles: Patients, Doctors, Admins, Employees, and Suppliers. Enabled real-time doctor-patient communication with an integrated chat feature. Optimized backend performance and scalability by implementing Redis for data caching. Ensured API clarity and accessibility by creating comprehensive documentation.

Dynamic Load Balancing using ABC Algorithm (08/2025 – 11/2025)

Java-based cloud load balancing simulator developed using the CloudSim Plus framework. Designed and implemented the Artificial Bee Colony (ABC) optimization algorithm to enable dynamic task scheduling across six virtual machines, ensuring balanced workload distribution. Conducted a comparative analysis of three different load balancing algorithms by processing over 30 cloudlets, evaluating performance based on execution time, throughput, and overall efficiency metrics.

SKILLS

Technical Languages : C, Java, javascript.

Tools : VS Code, MySQL, Ubuntu, GitHub.

Course Work : DBMS, Object-Oriented Language(OOP), DSA, Operating Systems, Computer Communication Networks.

Technical Skills : HTML/CSS, React.js, Node.js, Express.js, Redux, Software development, Full Stack Development, Data Structures, REST, Git, AWS.

Soft Skills : Aptitude, Reasoning, Problem solving, Leadership, Management.

EXTRACURRICULAR ACTIVITIES

- Competed in cricket tournaments, demonstrating leadership, resilience, and management.
